

Topic task 12.05.20

Welcome to virtual learning!

We have been looking at different plants and insects that we find in our local environment and beginning to explore plants and insects beyond our locality in different countries.

Today we are going to look at the impact to plants, insects and animals when their environment is destroyed.

1.) Watch the following clip of the Iceland Christmas Advert:

<https://www.youtube.com/watch?v=oA10-oZi4Xc>

Discuss the video with an adult at home. How did it make you feel? How does deforestation affect the animals and insects living there? What happens to the plants?

All living things are important and should be looked after. **How do you think we could help to keep animals, insects and plants safe in their own environments?**

2.) Using the image below, write some ideas of how you think we could protect the animals, plants and insects around the world from dangers like deforestation. You could draw a picture in the middle of your book if you prefer to work directly into your book.

The image shows a brown bear character wearing a blue mask and holding a bottle of 'NEW Silky SHAMPOO with Palmoil'. The bear is in a kitchen-like setting with a green lamp and various bottles. Surrounding this central image are eight empty thought bubbles, each connected to the central image by a black arrow pointing outwards.
